

RESEARCH INTERESTS

I am interested in cryptography (both classical and post-quantum). My research has been focused on Zero-Knowledge Protocols, Secure Multi-Party Computation, and Non-Malleability, with an emphasis on black-box techniques.

NON-CRYPTOGRAPHIC PROJECTS

- Training Data Reduction for Recursive Tensor Neural Network** 2015 Fall
(Collaborator: Niranjana Balasubramanian and Ankit Gupta)
- Propose a method to simplify the parsing tree, saving 40% of labeling work while maintaining the same level of accuracy.
 - Code to measure the performance of these models on different length of phrases and type of nodes.
 - Contribute to the [StonyBrookNLP/stingysentiment](#) on GitHub.
- Analysis of China's Agricultural Exports Using ARIMA & Clustering Model** 2014
(My Bachelor Thesis)
- Construct an ARIMA(1,2,1) model to predict the short-term export of agricultural products.
 - Conduct Hierarchical Clustering with 19 main products using IBM SPSS.
 - Provide policy-making advice based on analysis of trade structure.
